mini waxer

The Almore Mini Waxer is an excellent small compact utility waxer offering both value and space savings. One of the unique features of the Mini Waxer is that it plugs directly into an electrical outlet and therefore leaving your work area less cluttered. The Mini waxer measures only 4" x 2¼" x 1¼". Several interchangeable PKT waxing tips are available for this unit. The waxer features a temperature controller that allows you to select the best temperature for each waxing technique. The Mini Waxer maintains a constant temperature to permit a uniform wax flow which enhances the quality of your wax pattern and increases productivity. The waxing probe detaches from the unit and the on/off switch is illuminated when the unit is energized. The unit is available in 110V or 220V models. The waxer temperature ranges from 70 degrees to 490 degrees. A complete Mini Waxer includes one #3 small PKT Tip, one #2 medium PKT tip, one spoon tip and a detachable probe.
